

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove set out on a cross country RV expedition. After spending numerous years establishing his family built crane company with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

All through their journey, John reacquainted himself with past business associates along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast marketplace for a product that could promptly and safely lift individuals in the air to accomplish upkeep and other building functions.

Following their return from vacation, John set up a joint venture with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into current designs.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into many marketplaces worldwide and develops new products to ensure customers are capable of being more effective and perform in the workplace within a safer atmosphere.
